

Nomad Media Platform - Intelligent Solution for Houses of Worship

AWS Cloud-Based, AI-Powered Relationship Enrichment Platform

Houses of worship are facing a wave of new challenges in current times. Many environments are realizing for the first time that worship can be more than the building. That worshipping remotely not only meets people where they are but reaches a much larger section of the population. But how to bring these organizations online can be daunting. The solution needs to be secure, easily available to an audience, and set up for long-term storage and retrieval.

But providing an environment that meets all of these needs is proving to be a challenge for many. While online options like YouTube and Zoom seem convenient and inexpensive, the downsides outweigh the positives. Loss of ownership rights, forced advertisements, and a lack of security and long-term storage makes these options less appealing and leaves a void for a better fit. Nomad Media recognizes these needs and meets them, and then takes them a step beyond.

COMMON USE CASES

- Churches
- Synagogues
- Religious Schools
- Online Worship
- Prayer Groups
- Group Classes
- Special Events

SOLUTION:

The Nomad Media Platform enables pastors and worship leaders to upload or stream their videos directly into Nomad Media using their own device or by using our Zoom connector. Your meeting is automatically brought into the Nomad Media Platform, saved into a folder, and fully synchronized with the data around it. Your content is now secure, available to your audience, and saved for long-term storage and retrieval.

But it doesn't stop there. Now that you are with Nomad Media, our automatic content intelligence takes over and provides Search services. Nomad identifies objects, people and places and then tags them for future use. The audio is transcribed and then translated into the language(s) of your choice, providing inclusivity to the needs of your entire audience. All of this with the touch of a button.

And there's more. Use our included searching capability to let your audience find materials on any topic they want, whether it is a particular sermon, chapter, or idea. Nomad Media brings new opportunities to your audience and shows that the power of a sermon or prayer can last beyond the moment.
